## Background

Predicting bid responses from RTB buyers is a fundamental problem that has applications in many areas including Reserve Price Optimization (RPO) and [REDACTED]

In the context of RPO the key goal is to exploit the gap between the winning bid and the transaction price by inserting a (higher) reserve price between the two thereby inducing the winner to spend more. The challenge lies in predicting the per-buyer reserve price for each query. While the current RPO model generates [REDACTED], analysis indicates that [REDACTED]

[REDACTED] In fact, as can be seen from the analysis there are [REDACTED]

## Customizing Models [REDACTED]

One of the main motivations of this work is [REDACTED]

[REDACTED]  
[REDACTED]  
[REDACTED]  
[REDACTED]

Additionally [REDACTED]

**Comment [1]:** Can you say approximately by how much?

**Comment [2]:** I can run a query to get the actual numbers but here is a illustration: [https://\[REDACTED\]](https://[REDACTED])

To summarize, [REDACTED]

Understanding [REDACTED]

The [REDACTED]

**Comment [3]:** [REDACTED]

**Comment [4]:** Right, are these representing real traffic? If not, [REDACTED]

**Comment [5]:** Yes. [REDACTED]

**Comment [6]:** Oh, sorry, [REDACTED]

**Comment [7]:** I had also analyzed the [REDACTED]

We analyzed [REDACTED]  
[REDACTED]  
[REDACTED]

Moreover we also observed that [REDACTED]  
[REDACTED]  
[REDACTED]  
[REDACTED]  
[REDACTED]  
[REDACTED]

[REDACTED]

Summarizing the above observations, we see that [REDACTED]  
[REDACTED]

**Comment [8]:** Just to clarify: While I really like the idea and think that it's worth pursuing, it's important to recognize [REDACTED]  
[REDACTED]  
[REDACTED]

**Comment [9]:** There are several options here:  
1. [REDACTED]  
[REDACTED]  
[REDACTED]

**Comment [10]:** Yes, I think you're right that there absolutely are options, such as the ones you mention, so I'm not that concerned. :) Just wanted to bring it up.

**Comment [11]:** [REDACTED]  
[REDACTED]  
[REDACTED]

**Comment [12]:** I plan to spend some cycles over the next few months to think through the RPO story for GDN.

**Comment [13]:** But if we want to move GDN to RPO,

**Comment [14]:** I think there's a bit of a semantic shift in what 'RPO' means for [REDACTED] vs how we think about it here.

## Online Bid Prediction Framework
